

LIGHTWEIGHT PLYWOOD

DESCRIPTION

Albasia & Falcata plywood is a lightweight multi-layer panel manufactured from sustainably sourced Albasia and Falcata veneers, offering an excellent balance between strength, workability, and weight reduction. Known for its low density and uniform core structure, this plywood provides good dimensional stability, easy handling, and efficient processing in cutting, CNC routing, and assembly applications. Its smooth and consistent surface allows for painting, laminating, and veneering, making it suitable for a wide range of decorative and functional uses.

Due to its lightweight characteristics and reliable performance, Albasia & Falcata plywood is widely preferred in furniture production, interior fit-out, yacht and marine interiors, exhibition stands, architectural elements, and various industrial applications where reduced weight and ease of installation are essential.

We use multi-layer poplar, which means thinner innerlayers, which also means a more stable plywood.

LIGHTWEIGHT PLYWOOD

- Suitable for interior use
- Quality: BB/CC (IHPA-Standard), corresponding with B/BB
- Bonding: E1 interior
- Approx. 320 kg/m³
- Size: 250 x 122 cm
- Please ask for available thicknesses

Thicknesses:

3mm 10mm 15.5mm 25mm
4mm 11.5mm 17mm
6mm 12mm 18mm
8mm 14.5mm 20mm
9mm 15mm 22mm
